#### STATEMENT

(In the space below, please provide the showing of unavoidable delay recited in paragraph 8 above.)

Petitioners respectfully ask that this Petition be granted and that the accompanying unavoidably delayed maintenance fee, and the current maintenance fee, and surcharges for both, be accepted, and the patent Unavoidable delay in payment has been due to the Petitioreinstated. ers' having received no message stating, and being not aware, that a previous Petition (filed in March 2004, for acceptance of unintentionally delayed maintenance fee) was dismissed.

The Petitioners now know that the U. S. Patent & Trademark Office (hereinafter "PTO") mailed a Dismissal document to Petitioner Lippman in July 2005; however, that paper was misaddressed to a long-obsolete address and therefore never received.

Not until April 2007 did the Petitioners receive a message with notice of such Dismissal or its details, as will be proved below.

Full details of that previous Petition and of related circumstances are set forth below and in the attached "Additional Sheets".

Petitioners first became aware that this patent was not currently [CONTINUED ON ADDITIONAL SHEETS] in force on March 21, 2007 when

(Please attach additional sheets if additional space is need ed)

**OFFICE OF PETITIONS** 

# "<u>ADDITIONAL SHEETS</u>" OF THE SHOWING PURSUANT TO PARAGRAPH 8 OF THE PETITION

[STATEMENT, CONTINUED] Petitioner Lippman routinely checked his own docket calendar and saw that the 11½-year maintenance fee appeared to be due in May. Upon then looking in the PTO website to determine the amount of the fee, however, Petitioner Lippman was shocked to see that the website indicated the patent was expired.

Below are, in section 1 and sections 3 through 7, a first analysis based upon proximate cause; and in sections 8 through 14 a second analysis based upon a full chronology — both showing why Mr. Lippman had believed in good faith that the patent was in effect or the 2004 Petition still pending.

1. Analysis based upon proximate cause: The Petitioners in 2003 and 2004 communicated with the PTO in good faith, attempting to maintain the subject patent — but until late last month received no message stating that their communications had failed. Until then they also were not able to obtain a statement of the reason for failure of their 2004 communication.

From a reading of the now-available 2005 Dismissal, Petitioner Lippman believes that the document appears to invite a reply (within two months) curing a defect stated in the Dismissal. That defect appears to be, in its entirety, failure to successfully provide the necessary fees.

The document also appears to suggest (although it is not absolutely explicit) that a reply within that interval, with the necessary fees, would result in acceptance of the delayed fees and reinstatement of the patent — notwithstanding any and all previous delays.

The Petitioners respectfully submit that their delay in responding to the 2005 Dismissal document was <u>unavoidable</u>, be-

cause the mailed original of it was never received — and a facsimile copy was received only on April 27, 2007. Accordingly the delay in now making payment was likewise unavoidable.

For proof that the document was never received, Petitioners offer two main facts, fully supported in this Petition:

- Mr. Lippman's docket system demonstrates that the document was never available to calendar for reply (for details please refer to sections 3 through 6, below); and
- the Dismissal document on its face is <u>misaddressed</u> to a very old address (please see section 7, below) — at a time when a substantially correct address was in the PTO's file <u>of this case</u>.

The Petitioners first digress here to explain the relatively brief delay from March 21, 2007 to the present filing:

On March 21 when Petitioner Lippman discovered that the patent was expired, and when he saw in PAIR that a Dismissal had been mailed in 2005, he immediately telephoned the Petitions Office to determine the reason for dismissal. He spoke with Mr. Paul Janoski, then of that Office, who said that this case had a paper (rather than image) file wrapper and that it could be necessary to order that wrapper from archival storage; Mr. Janoski also said that he would send an e-mail message "to a contractor", requesting that a copy of the Dismissal be "remailed" to Mr. Lippman; and that this would probably take three or four weeks.

After waiting about three weeks, Petitioner Lippman inquired further (several times) and in due course was informed that the file had been returned to storage. He also was advised to take up the matter with Paralegal Liana (Chase) Walsh, who had written the Dismissal. Mr. Lippman was not at first able to reach Ms. Walsh, but after further effort did speak with her: she kindly said that she would send a copy of the document by facsimile, from her computer, right away.

Mr. Lippman asked that she wait a couple of hours, because his facsimile-receiving equipment was at that moment being repaired; and Ms. Walsh proposed to instead wait until the following day. Unfortu-

nately the document was not transmitted for almost two weeks, notwithstanding almost daily phone reminders.

The purpose of mentioning the time details, in the discussion above, is <u>not</u> to find fault. It is only to explain the unavoidable delay, from March 21, 2007 to April 27, 2007 in Petitioners' obtaining the Dismissal document so that they could determine its detailed nature, and so be able to respond to it. Since April 27, Petitioners have worked diligently to prepare this Petition.

This <u>basic discussion continues in section 3</u> of these "Additional Sheets", following the List of Exhibits that appears as section 2 here:

- 2. <u>List of fifteen Exhibits appended</u>
  after the last signature page of these "Additional Sheets":
- A) copies of four docket-sheet printouts (total 13 pages) for July and August 2005, showing nonreceipt of any Dismissal document in this case (docket "xAA-05"), mailed by the PTO in July 2005;
- B) a copy of that July 2005 item (Dismissal of a 2004 Petition);
- C) Petitioner Lippman's docket sheet for this specific case;
- D) Declaration of Mrs. Holly Aguilera;
- E) a copy of a relevant page of the PTO's June 2006 spreadsheet confirming entry of this case (column 2, line 2) into PAIR;
- F) a copy of Mr. Lippman's July 10, 2004 correct change-of-address notice to the PTO;
- G) a copy of a <u>substantially</u> correct (partially faulty) addresschange acknowledgment (<u>with its listing</u> in the PAIR "Image File Wrapper" section, showing "mail room date" December 14, 2004);
- H) a copy of a <u>current</u> Request for Data Correction, filed on the recommendation of Ms. April Wise in the Petitions Office;

- I) August and September 2004 documents (in unrelated cases) correctly mailed by the PTO directly to Mr. Lippman's new address;
- J) Declaration of John W. McLean, Ph. D.;
- K) a 2003 e-mail exchange between Mrs. Aguilera and Dr. McLean;
- L) for comparison as discussed in the present Petition, a copy of a 1999 coverletter used in paying the 3½-year fee;
- M) coverletter drafted November 6, 2003 used in attempting to timely file the 7½-year fee with six-month surcharge;
- N) March 2, 2004 Petition to Accept Unintentionally Delayed Payment; and
- O) coverletter which accompanied that Petition.
- 3. The July 15, 2005 Dismissal was never entered in Petitioner Lippman's calendar, for response while other contemporaneous documents were entered: Petitioner Lippman hereby states under penalty of perjury that the attached Exhibit A is a true and accurate photocopy of his four available docket-calendar printouts, totaling thirteen pages, covering the period from July 15 through September 15, 2005.

The calendar printouts were made in 2005 on:

July 25 (6 pages) — Exhibit A, pages 1 through 6

Aug. 16 (3 pages) — Exhibit A, pages 7 through

Aug. 25 (4 pages) — Exhibit A, pages 9 through 12

Sep. 13 (1 page) — Exhibit A, page 13.

For purposes of this Petition, each of these docket-calendar printouts has now been annotated. With the annotations, these four printouts are intended to be self explanatory. Each of the printouts begins with a "key" which is part of the original printing, but a rectangular box has now been drawn around

the key. Each key shows that a printout can have up to six sections, each containing deadline dates of a respective type:

- A. statutory (not extendable) within 30 days
- B. <u>extendable</u> within 30 days
- C. <u>internal</u>, within 7 days
- D. statutory (not extendable) more than 30 days away
- E. extendable, more than 30 days away
- F. internal, more than 7 days away.

In the annotations of these printouts, the designations "month" and "30 days" are used interchangeably. Below the key, in the body of the tabulation, boxes have now been drawn around the section headings too.

Each one of these four Exhibit A printouts includes PTO "deadline DATES" (now marked in large, bold lettering) occurring in the particular time period for permitted response to the Dismissal. Though the Dismissal sets a two-month nonextendable reply period, a thorough search of these sheets could look for a September 15 deadline in each of the six categories — i. e., for each of two intervals: statutory/nonextendable, or nonstatutory (most-typically extendable); or internal.

At the time of each printout, the calendar program automatically sorts the database to produce these categories and format them as shown in Exhibit A. It is Petitioner Lippman's office procedure to print the entire database roughly once a month, and (between those printings) just the first three sections, sections A through C, roughly once a week.

These facts make clear that a systematic docket system was being diligently, professionally maintained and followed. Further detailed proof of the existence and diligent use of that system appears below in sections 4 and 5 of these "Additional Sheets". Those sections are supported by the Declarations of Mrs. Holly Aguilera and Dr. John McLean, Ph. D. — presented as

the attached Exhibits D and J (following the signature page of these "Additional Sheets").

Within Exhibit A, boxes have also been drawn around groups of deadlines that <u>bracket the September 15 deadline for reply</u> to the <u>Dismissal</u> document — <u>or actually fell on that date</u> itself. In addition to the boxes, marginal annotations call attention to those entries which are on or near that deadline.

Such deadlines appear in Exhibit A on e. g.:

page 3,
pages 5 and 6,
pages 8 through 11, and

page 13 (two groups).

Yet Exhibit A contains <u>no</u> deadline for reply to the Dismissal at any date on or before September 15 — or in fact anywhere at all in the Exhibit. Petitioners respectfully submit that if the Dismissal had been received, its deadline would appear in Exhibit A, ideally in a nonextendable grouping.

Petitioner Lippman adds, still under penalty of perjury, that despite reasonable search he has found no evidence whatsoever that the mailed Dismissal ever arrived.

Petitioner Lippman likewise further states under penalty of perjury that beyond any question whatever, had he received that Dismissal document within the two-month period stated for permissible response, he would have promptly, timely and fully responded — including enclosure of the relevant fees.

Given these statements, if the above-stated understanding of the import of the Dismissal document is correct, the reason for delayed payment beyond September 2005 is that neither the mailed Dismissal nor any other message telling the Petitioners of maintenance fee nonpayment for this patent ever arrived (until April 27, 2007) — not by mail, not by FAX, not by e-mail, and not by telephone.

4. Reasonable care in DESIGN AND OPERATION Of the DOCKET-ING SYSTEM: In about 1990, Petitioner Lippman designed, programmed and put into service a computerized docket calendar for all his PTO and related deadlines. Since then he has maintained that system in operation. That calendar program runs in a "PC"-type computer under dBaseIII+ — but was an outgrowth of a previous system that he had programmed and operated for several years in the operating system of a Wang Word Processor.

Initially he also used a parallel docket system that was entirely manual. The computerized one, however, proved so reliable that that manual "shadow calendar" was very soon taken out of use. (This last fact in no way contributed to the delay in maintenance-fee payment in the present case, since the Dismissal document never arrived to be entered into any calendar.)

Since at least 1990 each member of Petitioner Lippman's office staff — most commonly one person at a time, denominated a "clerk" — has learned to use his dBaseIII+ calendar program. From time to time the program has been revised to facilitate some of the changes in PTO rules and practice, but such changes have not really been necessary since personnel know how to enter and retrieve information using the original program.

When the subject patent 5,467,122 was coming up for its 2003 maintenance fee, Petitioner Lippman's clerk was Mrs. Holly Aguilera, who was very familiar with the docket program and with all of Petitioner Lippman's patent matters. She had been employed continuously in the same capacity for about seven years, i. e. since 1996 — and had previously served as assistant clerk for several months in 1993.

As she became proficient in operations of the office, she and Mr. Lippman often checked each other's work, especially as to functions which they both knew were susceptible to residual

errors. Over time, such a final check was found to be needed less and less often, as Mrs. Aguilera became progressively better aware of the more-common "traps for the unwary".

In particular Mrs. Aguilera was thoroughly acquainted and familiar with the procedures for paying maintenance fees.

5. Reasonable care in ENTRY of the patent INTO THE DOCKETING SYSTEM: When the subject patent was issued, it was promptly entered into the above-described calendar program. In fact, Attached Exhibit C shows a printed docket sheet that the program created automatically (after requesting manual entry of the patent number, serial number, and filing and issue dates). It was later manually mounted in the case file for this patent.

As the Exhibit shows, the relevant dates were printed for the then-expected entire life of the patent, including both the half-year deadlines and the full-year deadlines — and also including "flag" or "warning" entries alerting Petitioner Lippman and his staff, roughly a month before each deadline.

Petitioner Lippman's office procedure calls for keeping the docket sheet in the three-panel case file, at the <u>top</u> of the central "PTO correspondence" panel (i. e., above all the other papers mounted on that panel). Whenever anyone opens the file, the docket sheet therefore appears conspicuously, showing the status of all unresolved deadlines.

This docket sheet of Exhibit C is for an issued patent, and accordingly shows only maintenance-fee deadlines. For cases still in prosecution (or not yet in prosecution), the docket sheets instead show deadlines for reply to Official Actions, foreign filings, statutory bars etc.

The order of entries in the docket sheet may seem curious.

That order, however, arises systematically from the way in

which the entries are initially generated, before the overall docket-calendar file is sorted with new entries in it.

Six of the entries in the sheet appear crossed off, in ink, by hand. Those marks reflect the fact that the PTO had been authorized to take the 2003 maintenance fee from a deposit account (as more fully detailed below) — and that the remittance was considered, in good faith, to have been made timely.

In summary, the subject patent was entered into the docket system in 1995, and a resulting docket sheet was mounted in the file folder. Petitioner Lippman attests that the docket sheet appeared in that folder, mounted to the panel reserved for PTO communications and docket sheets; and also that, as the November 14, 2003 maintenance-fee four-year deadline approached, the docket sheet was being correctly used.

The careful and professional manner of docket-system use in Mr. Lippman's office is further evidenced by Exhibit D, the Declaration of Mrs. Holly Aguilera — and particularly by paragraphs 1, 4 through 7, 12 and 13 of that Exhibit.

6. Reasonable care in keeping the PTO informed of Petitioner Lippman's address: On June 9, 2004 Petitioner Lippman received from the PTO by e-mail a spreadsheet confirming
entry of his cases into the PAIR system. Page 4 of the spreadsheet (showing the subject patent as the second item in the
second column) appears as Exhibit E. It shows Mr. Lippman's
then-correct address in Montrose, California. That was not a
new address; rather, he had been there for nineteen years.

PAIR records for the subject patent show that date, June 9, 2004, as the date of a "Correspondence Address Change". As the foregoing paragraph makes clear, however, that characterization is not entirely accurate. That is to say, there was not

any actual change of address shown by that June document; rather Exhibit E only confirmed receipt, in the PTO Electronic Business Center, of the spreadsheet data (identification of cases) from Mr. Lippman.

On July 10, 2004, after moving away from California, Mr. Lippman responded to that posted spreadsheet by filing a notice of his address change — also appended to this Petition, as Exhibit F. Please note that it <u>correctly</u> states his new address in Reno, Nevada — on Mockingbird <u>Drive</u> (not "Lane").

The PTO response to that notice, however, is faulty. As seen in Exhibit G, the PTO's December 14, 2004 "Change of Address" wrongly states his street suffix as "Lane". (That error is presumed due to well-known use of "Mockingbird Lane" in a long-running famous TV program.)

During the last few weeks, Petitioner Lippman spoke with Ms. April Wise, of the Petitions Office, about his having never received the Dismissal. Ms. Wise noted that the PTO records for Petitioner Lippman's customer number <u>in</u>correctly stated the address as on Mockingbird <u>Lane</u>. She recommended filing of a new address-change notice for that customer number.

Typically each week several pieces of PTO mail arrive correctly for Petitioner Lippman on Mockingbird Drive, a street which is in Reno's Cold Springs Valley. Mr. Lippman has found no "Mockingbird Lane" anywhere in the Reno area.

Cold Springs Valley is a relatively small, semirural area more than ten miles from the main population centers of Reno, and somewhat isolated by a mountain pass. Local postal carriers appear to very clearly know what streets are in the valley.

POSTAL SERVICE PROCEDURES — Furthermore, the U. S. Postal Service (hereinafter "USPS") should return to the PTO any PTO mail not delivered to Petitioner Lippman — but Mr. Lippman has

never been contacted by phone, FAX, e-mail or otherwise to resolve any question of such returned postal mail.

To briefly review the USPS procedures: on May 19 of this year Mr. Lippman telephoned the postmaster in Montrose, California — Mr. Lippman's previous city of residence. That postmaster, Mr. Voltaire Alfonso, after listening to the general facts of the present situation stated that the most usual and most-approved procedure is for the USPS to check — even before mail from the PTO leaves the east coast — for address-change notices on file. Since Mr. Lippman's USPS forwarding order by July 2005 was expired, no valid notice would have been found. (The expired notice, however, might have been found.)

Mr. Alfonso proceeded to explain that the next step, if no valid address-change notice is found then (or later in the process if need be) — and if it also appears (e. g., from an expired notice) that routine delivery will fail — is to look on the outside of the envelope for a legible return address. If such a return address is found, the USPS then forthwith returns the mailed piece to that address. This process takes only a short time.

If <u>no return</u> address is thereby found, however — e. g. if the envelope has been damaged or the return address blurred, etc. — the USPS instead sends the piece to a Dead-Letter Center. The staff members there <u>open</u> the piece, and search its <u>contents</u> for any indication of a source address.

Upon finding such indication, USPS staff members copy that address to a fresh envelope, place the entire original piece of mail inside that envelope, and return the entire freshly packaged item into the stream of mail for return to the original sender. Mr. Alfonso stated that this entire process in the Dead-Letter Center typically takes something over four weeks.

Only if no valid source address can be found either inside or outside the original mailed piece is the item consigned to truly "dead"-letter status. Since the PTO Dismissal document itself clearly states the PTO address, i. e. the address of a prominent government agency, Mr. Alfonso expressed doubt that the 2005 Dismissal document went anywhere but back to the PTO.

Based on all these facts, it is improbable that the minor address error (wrong street suffix) in the PTO records could have been responsible for nondelivery of the Dismissal document. With respect, the Petitioners submit that delivery went wrong because the document was on its face misaddressed (please see section 7 below) — and therefore was returned to the PTO. Once there, evidently, it was not investigated.

Nevertheless Ms. Wise's recommendation is greatly appreciated, and it has recently now been followed. A copy of the recent change-notice form, with its coverletter, appears as Exhibit H. The PTO responded to that form incorrectly (<u>leaving</u> the street suffix as "Lane"), and Petitioner Lippman has since corrected the PTO database on-line himself.

7. Failure of the PTO to correctly address or remail the Dismissal document, using Petitioner Lippman's mailing address as then officially on record in the PTO: In addition to Petitioner Lippman's docket printouts discussed above in sections 3 and 5, there is other evidence — even much stronger — that the original, mailed Dismissal document was never received: on its face, it was misaddressed.

The copy of that above-mentioned July 2005 Dismissal which is reproduced in Exhibit B (pages 2 and 3) was first received by Mr. Lippman via FAX in April 2007. It reveals that the Dis-

missal was addressed to his former, southern California location in July '05, even though a year earlier in July 2004 (proven in section 6) he had filed a PTO address change (Exhibit F) and in December the PTO had acknowledged it (Exhibit G). Evidently the Dismissal was prepared with reference to neither the PTO's general address record for Mr. Lippman's customer number, nor the specific address record shown in PAIR for this case.

CORRECT MAILING OF OTHER DOCUMENTS — Meanwhile, Petitioner Lippman has now found at least two documents (in unrelated cases) that came from the PTO addressed directly to his new address in August and September 2004. Coversheets of both those documents are appended as Exhibit I. They dispositively prove that the July 2004 address-change notice had begun to take effect in the PTO and was available for use there by August 2004 — nearly a year before the critical Dismissal was mailed in this case.

In his search that resulted in Exhibit I, Mr. Lippman ran across no documents mailed from the PTO after July 2004, concerning provisional or nonprovisional national applications, that were addressed to his old address — except for the July 2005 Dismissal in this case. (He did not attempt, however, to search for such later-mailed misaddressed items exhaustively.)

Of course before his actual change of location (June 2004)
Mr. Lippman also had deposited a mail-forwarding order with the
U. S. Postal Service. It is his understanding that the forwarding order expired in about June 2005.

Since PTO correspondence, by at least August 2004, had all begun to come <u>directly</u> to his new address by virtue of the July 10, 2004 address-change notice (Exhibit F), expiration of the forwarding order was not seen to be problematic. In actuality, however, since the 2005 Dismissal was <u>misaddressed</u> to Mr. Lippman's by-then-long-obsolete old office and home in southern

California, the Postal Service <u>almost surely returned</u> that document to the PTO. This is established by Mr. Lippman's telecon with Montrose Postmaster Voltaire Alfonso, as reported above in section 6 of these "Additional Sheets".

The Petitioners presume that, on arrival back at the PTO, the Dismissal document should have triggered an investigation to determine the correct address which should have been used in July 2005. That address had long been in the file, not only of the PTO for Mr. Lippman's customer number in general, but the electronic file of this case.

In fact as clearly shown in the PAIR system contents for this case, by <u>December 2004</u> the PTO had associated Mr. Lippman's then-current mailing address with this case. That is established by the "Address Change" document from PAIR's <u>image</u>-filewrapper section with mailing date "12-14-2004" as Exhibit G.

Although that document does contain the minor technical error in the street-name suffix, as discussed in section 6 above, if the Dismissal document had been addressed as in the PTO records (Exhibit G) it would surely have been delivered to Mr. Lippman promptly in July 2005. That conclusion holds true whether or not the PTO had entered the correct street suffix as in Exhibit F.

(Sections 3 through 7 above conclude the proximate-cause analysis started at Section 1.)

8. Analysis based upon full chronology — introduction:

Petitioner Lippman has consulted several staff attorneys and
others in the Petitions Office, seeking guidance as to the
nature and scope of proofs that should be presented in this
Petition — as well as information that might help facilitate

acquiring a copy of the Dismissal (as recounted earlier). The Petitioners in particular wish to thank Ms. Frances M. Hicks for thoughtfully considering the present situation and for explaining that each Petition is considered on its own facts and merits, and that no detailed guidance for the present situation could be specified.

Petitioners also gratefully thank Paralegal Ms. Liana Walsh for providing a facsimile copy of the Dismissal document; and Ms. April M. Wise for her well-reasoned observations and recommendations concerning Petitioner Lippman's address, as discussed above in section 6 of these "Additional Sheets"; and Mr. Paul Janoski for his initial help to Mr. Lippman in becoming oriented to the situation. In addition, Petitions Attorney Charlema Grant very kindly explained why — by virtue of severe caseload, as Mr. Lippman understood it — she was not at liberty to study the situation for purposes of giving preliminary advice.

To go beyond the above proximate-causation approach of section 1 of these "Additional Sheets", and sections 3 through 7: the circumstances here are essentially a series of interlinked events that began in a very modest way and escalated according to the "domino effect" into an extremely serious problem. It is especially severe in that the patent involved is of particular importance to the assignee — as witness the participation of that firm's president and chief executive officer, in this Petition, and his appended Declaration (Exhibit J).

That series of events is taken up in detail below.

9. <u>Initial submission of the maintenance fee</u>: On October

30, 2003 with the four-year deadline two weeks away, Mrs. Agui-

lera wrote by e-mail to Petitioner John McLean, Ph.D., who is the chief executive officer of the assignee Areté Associates, asking for authorization to pay the fee.

That inquiry is shown at the <u>bottom</u> of the attached Exhibit K, together with Dr. McLean's prompt response (at the center of the same Exhibit) — including his remark, "This is a very important patent for Areté." Furthermore, as the same Exhibit shows, when preparing that response Dr. McLean himself took the trouble to add another address to the distribution: he sent a "Cc:" (courtesy copy) to: "King, Jim" <king@arete.com>.

Mr. Jim King at that time was the chief <u>financial</u> officer of Areté. Thus Dr. McLean, the president and chief executive officer, wanted his chief financial officer to be reassured in advance (not even waiting for Mr. King to inquire) that the thousand-dollar maintenance fee should be paid — further demonstrating how important this patent was to the company. Also in the same exhibit, at the top, is Mrs. Aguilera's quick reply confirming her intention to file timely.

On November 6, 2003 Mrs. Aguilera in fact began looking for a suitable coverletter to accompany the fee. She knew that all of Petitioner Lippman's electronic documents were stored in computer directories ("folders") by client — and some even by specific docket code.

Not wanting to type and proofread all the numbers, names etc. relating to the subject patent, and being well trained to think about efficiency, Mrs. Aguilera looked in the correct computer directory for previous outgoing letters related to this patent.

There she immediately found in electronic form the letter that had been used four years earlier for payment of the <u>first</u>, fourth-year maintenance fee.

For reasons that will become clear momentarily, that 1999 letter is reproduced as Exhibit L of this Petition. Petitioners respectfully draw attention to the PTO address that Petitioner had used in 1999.

The 1999 PTO address appears in that letter at the top of the page, and also unfortunately — very unfortunately, as will be explained — within the mailing certification at the bottom. Thus, among the several variations needed to adapt the 1999 letter to 2003 purposes, there was one item that Mrs. Aguilera felt clearly ought to be freshly typed, namely the then-new mailing address of the PTO Maintenance Branch, where it appeared within the mailing certification. Exhibit M of this Petition shows the resulting November 2003 coverletter for the maintenance fee.

10. <u>Initial delay</u>: This retyping of the new PTO address, as such, was done correctly, and Mrs. Aguilera also revised some other passages (not important here) of the letter. In the process, she introduced a new but <u>unimportant typo</u> — and also unintentionally deleted a very important needed element — as seen in Exhibit M.

As comparison of Exhibits L and M suggests, to update the PTO address Mrs. Aguilera deleted the last part of the final sentence in the coverletter, and then typed in the new PTO address. Unfortunately that part of the final sentence included the mailing date. Hence the mailing certification became defective in that the mailing date was thereby omitted from it. Nevertheless Petitioner Lippman did sign that letter.

Although the coverletter and fee were mailed <u>before</u> the final deadline, since the mailing date was omitted from the certification, Rule 8 did not apply — and the PTO of course

responded that the fee was late and the patent had already expired when the fee arrived.

This particular component of delay was <u>curable</u>, and Petitioner Lippman <u>timely undertook to cure</u> it as described in section 11 below. Therefore, with respect, its contribution to the overall delay in filing of the maintenance fee is believed to be superseded by (or subsumed within) the unavoidable delay involving Mr. Lippman's nonreceipt of the misaddressed Dismissal document — as set forth above in sections 1, 3, 6 and 7 of these "Additional Sheets".

In addition to being unintentional, and curable, in a very important sense this delay itself also was <u>unavoidable</u>. It is possible for human beings to be well trained, and professional, and conscientious, and extremely careful, and to review their own efforts — all of which describes Mrs. Aguilera's excellent work beyond question — but it is never possible to entirely, completely "avoid" a last small residual of human error.

This fundamental truth is amply recognized in the MPEP and in the caselaw. More specifically, MPEP 711.03(c) quotes the decision in *Matullah* thus:

"The word 'unavoidable' . . . is applicable to ordinary human affairs, and requires no more or greater care or diligence than is generally used and observed by prudent and careful men in relation to their most important business. It permits them in the exercise of this care to rely upon . . . worthy and reliable employees. . . ."

In other words, perfection is not required; and that tiny possibility for human error is <u>literally</u> unavoidable. That last small sliver of human error is exactly what arose here. The Petitioners therefore respectfully submit that the error of inadvertently deleting the certification date, and Mr. Lipp-

man's execution of the letter with that error — and its resulting contribution to delay — were not avoidable.

11. March 2004 Petition to accept unintentionally delayed payment, and its dismissal: When Mr. Lippman received notification that the 2003 fee submission had been rejected as late, he and his staff timely prepared a Petition (Exhibit N, attached) to accept the delayed payment. They filed that Petition in the PTO in March 2004.

As part of that Petition they submitted a letter explaining what had gone wrong. A copy of that letter is attached as Exhibit O.

Mr. Lippman next learned — three years later, in a March 21, 2007 telephone discussion with a then-representative of the Petitions Office, Mr. Paul Janoski — that in July 2005 the PTO had mailed a Dismissal of the March 2003 Petition. As recounted above in section 1 of these "Additional Sheets", in due course Mr. Lippman on April 27, 2007 was able to obtain a copy of that Dismissal document and thereby learn the reason for dismissal.

To summarize, PTO processing of the 2004 Petition took one year and four months; and Mr. Lippman learned of the outcome another one year and nine months after that — i. e., a total of three years and one month after filing of the Petition. Mr. Janoski, in the March 21 telephone conversation, suggested strongly that Mr. Lippman should have looked into the matter during the interim of 16 to 37 months.

The Petitioners of course in hindsight <u>agree</u> that it could have been very useful to follow-up on the 2004 Petition. At the same time, however, <u>for the reasons detailed below</u> they re-

spectfully but strenuously take issue with the suggestion that there was any lapse in the duty of "reasonable care":

- Petitioner Lippman is not aware of any "standard" time period for completing a decision on a Petition to Accept Unintentionally Delayed Payment.
- Therefore the Petitioners very respectfully wish to point out that from the perspective of practitioners outside the PTO under all the unusual circumstances of 2001 through the present there is little to make 37 months seem less plausible than 16. More specifically, during a protracted and costly war that diverts money and other resources from the PTO, both of those intervals only seem to be long but plausible times for consideration of a Petition.
- The length of such intervals does not suggest any malfeasance. It simply suggests that the PTO Petitions staff is swamped with work. (This idea is consistent with Mr. Lippman's impressions of his conversations with staff.)
- Under these circumstances, in the vernacular, the Petitions Office appears to be "pedaling as fast as it can."

  The signing Petitioners believe that this is a result of the Federal Government's allocating stringently limited governmental resources to the PTO, particularly during wartime already ongoing for three years in 2005 and with an enormous Defense budget.

Therefore it would seem neither helpful nor courteous for Mr. Lippman to "pester" the Petitions Office staff — any more than it would have made sense to complain about discolored and brittle acknowledgment cards or other PTO disruptions after the 2001 Pentagon and anthrax attacks. Rather it seems more appro-

priate (and perhaps a patriotic duty) that he patiently let the matter lie — until receiving a decision in due course.

12. Relocation of office: The Petitioners draw attention to Petitioner Lippman's change-of-address notice (please refer to Exhibit F) in this case, and related complications. That notice was submitted to the PTO in July 2004, and it is reflected substantially (though not absolutely) correctly in the address shown for Mr. Lippman in the PTO records between 2004 and the present.

The attached Exhibit G shows that Ms. April Wise — of the Petitions staff — was correct in noting that the official records included a faulty showing of the street suffix as "Lane" rather than "Drive". In view of the <u>fully correct</u> appearance of the address in the change-of-address notice (Exhibit F), the Petitioners respectfully point out that the Petitioners did <u>not</u> contribute at all to that faulty indication of the street suffix. Rather, it is believed to be wholly due to error in, e. g., the Electronic Business Center.

As discussed in section 6 above, <u>if the Dismissal had been</u> mailed in accordance with Exhibit G, it is <u>possible</u> that it might have gone astray for some reason related to the error in street-name suffix ("Lane" rather than "Drive"). As section 6 makes clear, that was the professional view of Ms. April Wise and it cannot be said that she was incorrect.

Mr. Lippman's own opinion (suggested in section 6) is that mail sent with a misstatement of "Lane" rather than "Drive" — if not just delivered to him without delay, as routinely happens — very likely resolves itself within two or three weeks.

Nonetheless, pursuant to Ms. Wise's advice, a <u>new</u> addresschange notice, <u>specifically calling attention to</u> the detail of the street-name suffix, has now been submitted. A copy of that new notice appears as Exhibit H. As the PTO disregarded that detail, Mr. Lippman subsequently followed-up with an on-line correction.

In midJune 2004, Mr. Lippman moved away from Los Angeles, California — where he had been from 1943 — to Reno, Nevada. Although Petitioner Lippman considers himself (and makes great effort) to be reasonably well organized, there may be unavoidable imperfections in this effort.

In April through June 2004, during preparations for the move, his residence and office were unavoidably in a state of flux. Furthermore, Mrs. Aguilera and a then-assistant clerk were not available to also move from Los Angeles to Reno, to continue their employments with Mr. Lippman.

Both these people were very good employees and had received considerable training; their loss was a severe blow.

Over the years Mr. Lippman had trained several office clerks to his methods and procedures, and had become reasonably effective in that role.

In his new office he was able to restore basic functions with reasonable promptness. In training of new employees, of course use of the docket system is paramount, and Petitioner Lippman took pains to be certain that incoming correspondence was promptly and properly calendared and filed.

He believes that <u>long</u> before July 2005 incoming matters were once again being routinely and correctly calendared. The docket-sheet printouts of Exhibit A substantiate this belief.

Based upon a current general review of PTO correspondence from 2003 to 2005, Petitioner Lippman has come to a tentative belief that the Office of Petitions had its own procedures and (undoubtedly for good and well-considered reasons) eschewed use of the PTO's master address files in favor of answering to the address on an incoming Petition.

On one hand, the Petitioners certainly would not presume to criticize such procedures. On the other hand, it is believed that such departure from standard PTO processing is not at all general knowledge among registered patent practitioners.

Had Mr. Lippman known of such a divergent method, of course he would have written or telephoned the Office of Petitions in July 2004, immediately after moving to Nevada, to make sure that his correct and current mailing address was in the file for his 2004 Petition. Although that does not seem to have been required, it would have been a common courtesy; but unfortunately he did not know or suspect that the Office of Petitions used a divergent method.

13. Track record: Other sections of this Petition focus upon explaining delay, and upon analyzing causes of error. While that negative focus is entirely appropriate, the Petitioners respectfully wish to point out that the occurrence of delay and error in a patent practice can only be fully understood in the context of other characteristics of the practice.

To provide such a more-balanced perspective, some positive aspects of Petitioner Lippman's practice are outlined here:

He has actively drafted and prosecuted patent applications for more than 36 years, having started as an independent patent agent. He took time out for a California law degree, magna cum laude, about 30 years ago.

He has drafted and filed about 410 U. S. nonprovisional patent applications (plus 30 provisionals) — some filed in the

names of clients' corporate counsel, or of lawfirms, or lawfirm partners. So far more than 330 of his U.S. cases have issued.

(Clients elect to drop some cases because inventions don't work as well as expected, or due to marketplace disappointments or financial constraints. Occasionally there are PCT search surprises.)

One of his individual clients, and one of his corporate clients, have each earned between one and two million dollars from sale or licensing of patents that Mr. Lippman drafted, filed and prosecuted. Likewise based upon Mr. Lippman's work, some clients of Mr. Lippman's former law partners have fared even better.

At least apart from the present case, he has never incurably failed to file a maintenance fee. He has twice made oral argument before the Board of Appeal, both times successfully. Over 36 years, he has maintained reasonably cordial relations with all but two examiners and all but two clients, not been sued by anyone for anything, never been accused of malpractice (some of his former partners cannot say this), and never been disciplined or warned by either the Bar Association or the PTO.

14. Continuity and refinement of office operations: Despite extensive and energetic efforts to make the transition to a new locale in Nevada as smooth as possible, there was some temporary irregularity in office function. It did not, however, affect this case.

EMPLOYEES — Long before July 2005 (when the PTO mailed the Dismissal document), Petitioner Lippman had an employee capably making calendar entries in Nevada. The calendar is one of the most-critical and first-taught functions of his office, and it

was under control at the time when the Dismissal would have arrived — if it had ever arrived.

All of his several successive employees in Nevada started out knowing nothing of patents and office management — and so required that Mr. Lippman extensively train them, essentially from scratch. Nevertheless, he believes that the integrity of the calendar was maintained throughout 2005 and to the present. In addition, his personnel situation has stabilized, with finding of an excellent longterm employee.

MORE-INTENSIVE FOLLOW-UP — Partly in response to this present situation involving the maintenance fee for the subject patent, Petitioner Lippman has now strengthened his routine follow-up efforts. He now adds follow-up entries into his docket calendar — for essentially all papers that he files in the PTO.

At each point, every follow-up entry is rolled over into another follow-up entry:

- when an acknowledgment card is received, another entry is created to watch for a PAIR posting;
- then when PAIR shows that a paper is in the PTO's file, another entry is created to watch the PAIR website for forwarding of the filed paper to the examining group, or other entity within the PTO;

and so on until it is clear that appropriate action by the PTO has been actually completed.

This enhanced follow-up program is aided by very extensive use of the PAIR system to check status without having to interfere with the work of PTO employees. If it would be of interest, Mr. Lippman would be glad to submit additional exhibits showing examples of routine status-check entries.

Use AND MONITORING OF THE DEPOSIT ACCOUNT — With arrival of the 2005 Dismissal document by facsimile, it has now become possible to see that the present maintenance-fee delay involved Petitioner Lippman's deposit account. After thinking through the detailed causes of the delay, he has now put into operation a "shadow" bookkeeping system for more aggressively monitoring moneys flowing out of that account.

This change in procedures represents an effort to learn from this very regrettable experience. He has now recognized certain limitations of the PTO's deposit-account system, and is using these recognitions to improve his office operations.

These points are all detailed below.

1) WITHDRAWALS ON GENERIC INSTRUCTION — In the routine use of a deposit account, funds are very often withdrawn by the PTO staff (correctly) without specific instruction from Mr. Lippman. That is in fact a main objective in <a href="https://example.com/having-a-deposit-account">having a deposit account</a>; it does nevertheless complicate any effort to know what the balance really is.

In his bookkeeping system previously he has simply distributed, after the fact, funds flowing out of the deposit account — based upon the monthly deposit-account reports — and has relied upon "the system" to eventually sort out all such transactions.

2) WITHDRAWAL FAILURES NOT REPORTED — A danger in this approach, only now belatedly clear to Petitioner Lippman, is that the PTO's deposit-account reports do not reveal EFFORTS by PTO personnel to withdraw funds — when there is not enough money to withdraw. If the reports did show such efforts, then in this case that would have alerted Petitioner Lippman to the problem which Petitions Paralegal Liana Walsh had encountered — and would have done so within the two-month period permitted for reply to the Dismissal.

Had that occurred then of course he would have timely rescued his 2004 Petition (to accept the unintentionally-delayed maintenance fee). If his understanding is correct, then evidently this present Petition would not have become necessary. The deposit-account reports, however, in fact do not enable such rescue.

3) TELEPHONE ALERTS (AND EFT'S) OPTIONAL — Occasionally staff in the PTO have <u>telephoned</u> Mr. Lippman to say that funds are required for some particular fee — and Mr. Lippman has immediately used the electronic-funds-transfer system to replenish his account. When this happens, the PTO staff is able to actually <u>see</u> the changing balance in the deposit account, in real time <u>during the phone conversation</u> — and this is an extremely useful capability.

The Petitioners do not suggest that the Office of Petitions "should have" telephoned. This too comes under the heading of courtesies rather than obligations. Unfortunately in this present matter, as previously mentioned he received no such telephone call or other message.

- 4) Deferred withdrawals for Petition fees Also unfortunately he had taken for granted that the fees for his 2004 Petition would be withdrawn from his account within a few months whether or not a Decision on Petition was generated in that time and accordingly he was not watching the balance closely during the time interval (thirteen months later) when Ms. Walsh apparently was checking for those Petition fees.
- 5) PROCEDURES FOR CURING THESE LIMITATIONS In his new system for monitoring his deposit account, Mr. Lippman now uses simple commercial software to track debits and credits as if the deposit account were a bank account. When he specifically asks

PTO personnel to withdraw money from the deposit account, he then enters the anticipated withdrawal into the software.

The software is promptly reconciled against each monthly report. When the monthly report shows a sum of money out (or in) that has not already been entered into the software, this sum is entered at that time. If already entered earlier, that earlier entry is simply confirmed; if not already entered, then the new entry resolves the matter.

Each month the software "should" show a balance equal to that in the deposit-account report. If not, then suitable action is taken to correct either the deposit-account records or Mr. Lippman's shadow software accounting, as appropriate.

In particular, if the deposit-account report fails to reflect a withdrawal which Mr. Lippman has asked the PTO staff to
make, then he can promptly follow-up with PTO staff. In the
present case, such follow-up could have been required — and
would have been performed — monthly for thirteen months.

6) Types of Deposit-Account transactions disfavored — Although this would eventually have prevented the delay involved in this case, that is not an ideal way to prevent such delay. Thus the history of the present case also shows that the deposit account is excellent for some kinds of payments but not others.

In addition to making payments that are needed immediately, the deposit account is fine for routine fees that can reasonably be expected to "clear" within a month or two. It is not well suited, however, for any open-ended situation in which the practitioner cannot at all predict how long the withdrawal instruction may be held pending.

In those situations it appears best to pay by check. This is Petitioner Lippman's plan for future such situations.

15. Other requirements: Based upon the last paragraph of 37 CFR § 1.137, Petitioners believe that no Terminal Disclaimer is required in this matter. In event this understanding is not correct, Petitioners request an opportunity to cure.

- 16. <u>Conclusion</u>: The Petitioners respectfully submit that they have complied with all requirements of MPEP 2590 and 37 CFR § 1.378. More specifically, this Petition provides:
  - "(1) the required maintenance fee set forth in §1.20 (e)-(g);
  - "(2) the surcharge set forth in § 1.20(i)(1); and
  - "(3) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent."

Further, the required showing herein <u>does</u> "enumerate the steps taken to ensure timely payment of the maintenance fee, the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly."

The Petitioners therefore ask that the accompanying eightyear fee and surcharge be accepted, and that the subject very important patent U. S. 5,467,122 be reinstated.

 $12-{\tt YEAR\ FEE}$  — Further the Petitioners very respectfully take the liberty of also offering, with this Petition, the twelve-year maintenance fee for the subject Patent, so that <u>in</u>

case this Petition is granted the Patent will not lapse for nonpayment of the fee normally due in 2007.

The Petitioners hope but of course do not presume that this Petition will be granted. If this tender of the current-year fee herewith is deemed improper, the Petitioners sincerely apologize and invite refund of that fee or such other action as would be preferred.

TELEPHONE CALL — In the event of any obstacle to granting this Petition, the Petitioners earnestly ask for a phone call to Mr. Lippman at 775/677-8822, to discuss such obstacle. In case he is not available to take such a call, the Petitioners hereby authorize Mr. Lippman's clerk, Mrs. Shaliene D. Ray, to discuss any and all matters related to this Petition.

Respectfully,

John McLean, Ph. D.

COPY MAILED

JUL 1 5 2005

OFFICE OF PETITIONS

In re Application of Bowker et al. Patent No. 5,467,122 Application No. 08/046,335 Filed: April 12, 1993 Issued: November 14, 1995 Attorney Docket No. xAA-05

ON PETITION

This is a decision on the petition under 37 CFR 1.378(c), filed March 15, 2004, to accept the delayed payment of a maintenance fee for the above-identified patent.

The petition is **DISMISSED**.

If reconsideration of this decision is desired, a petition for reconsideration under 37 CFR 1.378(e) must be filed within TWO (2) MONTHS from the mail date of this decision. No extension of this two-month time limit can be granted under 37 CFR 1.136(a) or (b). This is **not** final agency action within the meaning of 5 U.S.C. § 704.

A petition to accept the unintentionally delayed payment of a maintenance fee under 35 U.S.C. § 41(c) and 37 CFR 1.378(c) must be accompanied by: (1) a statement that the delay was unintentional; (2) payment of the appropriate maintenance fee, unless previously submitted; (3) payment of the surcharge set forth in 37 CFR 1.20(i)(2).

This petition lacks items (2) and (3) above. The funds were attempted to be collected from petitioner's deposit account, No. 12-1639 numerous times, but there was never sufficient funds. As of July 2005, the account is listed as having a negative balance. Accordingly, to reinstate the above-identified application, petitioner must supply the maintenance fee and the \$1640.00 surcharge.

Any petition for reconsideration of this decision must be accompanied by the petition fee of \$130 as set forth in 37 CFR 1.17(h). The petition for reconsideration must include the lacking item(s) noted above, since, after a decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner.

Petitioner should note that if this petition is not renewed, or if renewed and not granted, then the maintenance fees and post expiration surcharge are refundable. Petitioner may request a refund of the fees submitted on March 17, 2004. Please send all requests for refunds to the following address:

#### DECLARATION OF HOLLY B. AGUILERA

Hon. Commissioner for Patents P. O. Box 1450 Alexandria VA 22313-1450

Sir:

- I, HOLLY B. AGUILERA, declare as follows.
- 1. I was employed by Patent Attorney Peter Lippman as an office clerk in his Montrose, California private-lawfirm patent-law office for a few months in 1993 (at that time as

### Exhibit D -- page 1 of 5

assistant clerk), and later again for nearly eight years — from the fall of 1996 through June 16, 2004 when he left southern California to live in Reno, Nevada.

- 2. During most of my second employment with Mr. Lippman, I was his only employee; however, for about the last year and a half we had another employee who was assistant clerk, Miss Nichole Cecere.
- 3. During my employments, at first Mr. Lippman was associated with another patent lawyer, Mr. Robert Ashen. Later that relationship ended and Mr. Lippman became a sole practitioner. From my viewpoint, however, there was very little difference between the two situations: the employment was with Mr. Lippman, and was continuous.
- 4. When I first started work for Mr. Lippman, I knew essentially nothing about patents. He trained me in all aspects of his private patent-lawfirm operations, and well before late 2003 (when the subject maintenance fee came due) I was able to perform essentially all the clerical functions of his office with minimal supervision. I found patent work interesting, and I enjoyed it as I do now.
- 5. When Mr. Lippman left California, by virtue of the training he had provided I was easily able to find other employment in the field of patents. My first such position was with the patent department of Amgen Incorporated; I was successful there, but the commuting time was extreme, so after about one year I decided to take work closer to my home. My next position was with Precision Dynamics Corpo-

ration in San Fernando, California — and I held that job for two years, until early last month (May 2007) when I took an opportunity to join the patent department of the well-known Disney company.

- 6. My patent-prosecution skills in these positions have been found acceptable, and in the first two employments were rewarded with routine wage increases.
- 7. Of my own knowledge, it is particularly true that Mr. Lippman is careful, thorough and very patient in training employees. That is true not only for me but also for his participation in training a previously mentioned assistant clerk, who worked for Mr. Lippman part-time for a year and a half, partly under my supervision, during my employment with him.
- 8. I have read a May 22 draft of Mr. Lippman's "Petition to Accept Unavoidably Delayed Payment of Maintenance Fee in an Expired Patent", including the Exhibits. Based on the dates involved, many of the passages in that draft Petition are outside my direct experience; I cannot comment on them.
- 9. I agree with all of the portions dealing with me and my participation in the efforts to pay the 2003 maintenance fee for U. S. 5,467,122 particularly the discussions in the "Additional Sheets" section 9, and the first parts of sections 10 and 11.
- 10. As the Petition states, it was I who drafted the November 2003 letter (Exhibit M of the present Petition) that

had a faulty mailing certification, and who also drafted the March 2004 letter (Exhibit N of the present Petition) that explained how the date came to be deleted from the mailing certification. Of my own knowledge, that explanation was completely true; and the discussion of it in the present Petition (section 9) is likewise true.

- 11. I remember feeling embarrassed for having deleted the date from the end of the mailing-certification paragraph, in the November 2003 coverletter. Nevertheless I do agree that overlooking the deletion was one of those "human errors" which does very occasionally occur, even despite great care to avoid them.
- 12. The reason for that, in my opinion, trying to look at the work very objectively, is that in every document going to the PTO there are many details of great importance, any single one of which can cause a document to misfire severely. Considering myself a professional in this field, I always do my best to check and double check each and every detail, and sooner or later a mistaken computer keystroke or two has a disproportionate effect and produces a disastrous result, which somehow is just not noticed. Computers are wonderful machines: they tremendously amplify our capabilities, but unfortunately also our errors.
- 13. When I made that error, having done such work for more than seven years I knew perfectly well that a mailing certification had to have a date in it. The reason I made that deletion was not that I wanted to remove the date, but

rather that I wanted to correct the address, and removed the date accidentally in the process.

All statements herein made of my own knowledge are true; all statements made on information and belief I believe to be true. I understand that willful false statements and the like herein are punishable by fine or imprisonment, or both (18 U.S.C. 1001) and may jeopardize the validity of the subject patent.

June <u>5</u>, 2007 date

Holly B. Aguile

Office of Petitions

DECLARATION OF JOHN W. McLEAN, Ph. D.

Hon. Commissioner for Patents P. O. Box 1450 Alexandria VA 22313-1450

Sir:

- I, JOHN W. McLEAN, declare as follows.
- 1. I am the president and chief executive officer of Areté Associates, a company which is the assignee of the entire interest of the patent identified above.
- 2. I hold a doctorate from the California Institute of Technology and have over 25 years of experience in developing new concepts, performing research, and managing the integration and delivery of optical/mathematical systems for the Department of Defense.

### Exhibit J -- page 1 of 5

- 3. Also I am a coPetitioner in this matter. My participation in the Petition is primarily due to the very great importance of this matter to Areté Associates.
- 4. The e-mail correspondence in Exhibit K of the accompanying Petition) appears to me, of my own knowledge, to be a true and correct copy of my actual 2003 correspondence with Mr. Lippman's office clerk, Mrs. Aguilera.
- 5. As I stated in that 2003 correspondence which I went out of my way to copy to our chief financial officer, Jim King and as I have reiterated in paragraph 2 above, this patent is a very important one to our company, Areté Associates.
- 6. Of course I understand that the patent cannot be reinstated merely because it is important to our company.

  Therefore I have reviewed the entire Petition and all its Exhibits with very great care.
- 7. Based upon that review, I have satisfied myself that all the delay in paying the eighth-year maintenance fee was in fact unavoidable, within the confidence level for "prudent and careful men in relation to their most important business". I notice in the quotation from the Matulla decision in Section 10 of the "Additional Sheets" of the Petition that this is the standard of review to be applied here. I am very well equipped to evaluate the facts of this case under that standard, because I am a prudent and careful man, and this matter is part of my most important business.

- 8. I have been acquainted with Patent Attorney Peter Lippman for more than eight years, going back to the period before my present position with Areté. In 1999 he prepared a patent application in which I was a coinventor, and which eventuated into U. S. 6,836,285.
- 9. In that project and since then, we have not always agreed on every detail of our professional relations. Nevertheless I have been impressed by his intelligent devotion to optimizing Areté's patent coverage and also with his forthrightness and promptness in keeping me informed of developments, including those which might seem to cast him in a bad light. For example, he informed me of the present maintenance-fee situation immediately upon having learned about it in March.
- 10. I was and, still am, very upset to learn that the maintenance fee for the subject patent 5,467,122 has not been successfully paid. Before obtaining a copy of the 2005 Dismissal document, Mr. Lippman at first suggested to me that possibly he might, somehow, have contributed to that lack of success in making the payment.
- 11. I was gratified to see that his internal docket records (Exhibit A of the Petition) substantiate his belief that he never received the Dismissal.
- 12. I was still more gratified to learn that the PTO addressed the Dismissal (Exhibit B), on its face, to his <u>former address</u> —

- more than a year after the PTO received a proper address-change notice (Exhibit F) from Mr. Lippman, and
- eleven months after the PTO began sending mail directly to Mr. Lippman's new address (Exhibit I),
- even six months after the PTO officially confirmed his new address (Exhibit G), and
- about a month after expiration of the postal forwarding order that Mr. Lippman submitted to the United States Postal Service (section 7 of the "Additional Sheets" in the Petition).
- 13. In the aggregate, these facts would seem to make it all but certain that he never received the Dismissal.
- 14. I have also studied with great interest section 11 of the "Additional Sheets" taking up Mr. Janoski's suggestion that Mr. Lippman should have followed-up the 2004 Petition. It happens that Areté does a very large fraction of its business with the United States Government, and I am comfortable to say: (1) the PTO's protracted processing of the 2004 Petition is wholly understandable, and (2) I concur that persistent follow-up would have aggravated the overall situation. These have been difficult times.
- 15. Although of course I know very, very little about the internal processes of the PTO, as a matter of objective fact I do know a lot about the procedures followed by "prudent and careful men in relation to their most important business". Based upon that standard, the facts noted in my paragraphs 11 through 14, just above, lead me to believe

that Mr. Lippman made no significant contribution to that part of the delay which followed mailing of the 2005 Dismissal document.

- 16. As to the delay occasioned <u>before</u> that mailing, I have thoughtfully considered the actions and efforts of both Mr. Lippman and his clerk, Mrs. Aguilera as represented in the "Additional Sheets", sections 6, 7, 9, 10 and 11 (and also in Exhibit D, and Exhibits K through O).
- 17. Based upon those pieces of information I believe that the causes of that earlier delay, too, satisfy that same standard especially in that those causes conform to the human-error criterion articulated in Matulla. I see that the efforts of Mr. Lippman and Mrs. Aguilera even though in certain regards obviously imperfect are within the expectations of a careful and prudent businessperson such as I am.

All statements herein made of my own knowledge are true; all statements made on information and belief I believe to be true. I understand that willful false statements and the like herein are punishable by fine or imprisonment, or both (18 U.S.C. 1001) and may jeopardize the validity of the subject patent.

June 4, 2007

John W. McLean, Ph. D.

President and CEO Areté Associates

re:

U. S. utility-patent 5,467,122, issued November 14, 1995

from serial 08/046,335, filed April 12, 1993

of J. Kent Bowker et al.

for: "UNDERWATER IMAGING IN REAL TIME USING SUBSTANTIALLY DIRECT DEPTH-TO-DISPLAY-HEIGHT LIDAR STREAK MAPPING"

our xAA-05

Dear Sir:

Enclosed for filing please find a Petition to Accept Unintentionally Delayed Payment of Maintenance Fee in an Expired Patent, along with a copy of our previously filed cover letter used in attempting to timely file the 7 ½ year maintenance fee plus six-month surcharge.

As you can see from the copy of our previously submitted cover letter, we in good faith believed we were timely submitting the necessary maintenance fee and surcharge, however in adjusting the mailing certification in the last paragraph to show the new PTO mailing address, we inadvertently deleted the mailing date so it was not accepted as a Rule 8 certificate of mailing.

Please debit the necessary fee for this petition from our deposit account 12-1639.

Respectfully submitted,

Peter I. Lippman Reg. No. 22,835
